Title: Engineering Materials, Vol I and Vol II

Author: Wang Wen-hsiang (王文翔)

Publisher: Chung-kuo Kung-yeh Yueh-k'an She, Shanghai, Sep 1952 (Fourth Edition)

Sponsor or

Issuing Authority: None indicated

No Pages: Vol I, 194; Vol II, 100

Language: Chinese

Area of Coverage: China. World-wide

Subjects Covered: Description of the properties, use, price, and production of engineering materials

Review: A reference manual for consumers and suppliers of engineering materials. Volume I gives a brief description of 83 materials, classified under such headings as: nonferrous metals, nonferrous alloys, pig iron, ferrous alloys, alloy steels, alloy tool steel, etc. Volume II classifies 11 categories of engineering materials, including solders, wires, wire netting, wire ropes, chains, belts, rivets, etc. Gives source and volume of production for some materials produced in China.
